

Maji Systems, Inc. Joins EMC Select Program

Maji Systems teams with technology partner EverGreen Data Continuity, Inc. to enable EMC customers to reduce the time and effort required to build, maintain, and update business contingency plans

FOR IMMEDIATE RELEASE; Marlborough, MA (January 26, 2006) – Maji Systems, Inc a leading systems integrator and infrastructure planning firm, and its technology partner EverGreen Data Continuity, Inc., today announced that EverGreen's Mitigator® business continuance management software is now available for purchase through EMC Corporation's EMC Select Program. Mitigator joins a group of best-in-class solutions as part of this program, that enable EMC customers to easily acquire the components of an end-to-end information lifecycle management (ILM) solution.

The addition of EverGreen's Mitigator software and Maji Systems services to the EMC Select Program will help EMC customers optimize their business continuance planning efforts with their business and IT stakeholders. Mitigator users can easily develop business impact analysis, as well as, create, manage, and distribute business continuity and recovery plans across the organization. Mitigator also allows organizations to automate the change management process of maintaining business continuance plans.

"Business continuity management continues to be a growing focus area for many public, private, and government organizations" said EMC's Sean Kinney, director of the EMC Select Program. "EverGreen's Mitigator business continuance management software will help our customers more efficiently plan and react to business and operational threats."

"Availability of this software through the EMC Select Program will help reinforce the value of robust business continuance management tools and services" said Pat Barton, CEO of Maji Systems, Inc. " Business continuity has become a lifecycle process that requires participation from both business and IT stakeholders.

Maji Systems will also provide EMC with pre-sales and marketing support for EverGreen's software and services. Both Maji and EverGreen will provide EMC with Certified Business Continuance Professional (CBCP) consulting resources to assist in Mitigator implementation engagements.

"Mitigator's availability through the EMC Select program will help EverGreen to expand the reach of its business continuance management offerings in North America and beyond," stated Steve Burns, president, EverGreen Data Continuity, Inc. "We look forward to helping EMC customers implement single source, end-to-end business continuance solutions."

EverGreen's Mitigator is a Microsoft Windows® – based software product that is licensed based on the number of business continuance plan administrators required by the customer. All Mitigator licenses provide unlimited user access to development surveys and completed business continuance and emergency response plans.
